

CERAMIC FILTERS MULTI-ELEMENT, RESIN MOLDED, HIGHLY SELECTIVE

CFU/CFWS 455KHz

The CFU 455 line of ceramic filters are 4-element devices connected in ladder form while the CFWS 455 line of ceramic filters contain 6-elements. These compact, highly selective filters are recommended for use in applications ranging from two-way radio to auxiliary filters in high class transceivers. (Also available in 450KHz version.)

CHARACTERISTICS

*Available as standard through authorized Murata Electronics Distributors.

*Note: For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.
